TOXICOLOGY

# Subject index of volume 161

**Accelerator mass spectrometry**; Aluminum; Oral bioavailability; Drinking water; Gastric contents; Water hardness; Rat **161**, 93

**Aconitase**; CYP2E1; Ionizing radiation; Mitochondrial injury; Chlorzoxazone **161**, 79

**Agaricus bisporus**; Mushroom; Agaritine; Hydrazines; Tyrosinase-bioactivation **161**, 165

**Agaritine**; Agaricus bisporus; Mushroom; Hydrazines; Tyrosinase-bioactivation **161**, 165

**Aluminum**; Oral bioavailability; Drinking water; Gastric contents; Water hardness; Accelerator mass spectrometry; Rat **161**, 93

**Animal model**; Lung fibrosis; Obstructive lung disease; Pulmonary function measurements **161**, 153

**Antioxidant**; Trihydroxybenzaldehyde (THBA); DPPH; MTT; Lipid peroxidation; HL-60 cells **161**, 179

**Bivalve**; Hemocyte; Phagocytosis; Flow cytometry; Environment; Heavy metals **161**, 201

**Cadmium adaptation**; Lung; Oxidative DNA damage/repair **161**, 25

**Cadmium**; Cell transformation; Connexin (Cx); Gap junction intercellular communication (GJIC); *N*-methyl-*N*′-nitro-*N*-nitrosoguanidine (MNNG) **161**, 117

**Carbon tetrachloride**; Injury; Liver; Metallothionein; Rats; Regeneration **161**, 129

**Cell transformation**; Cadmium; Connexin (Cx); Gap junction intercellular communication (GJIC); *N*-methyl-*N*′-nitro-*N*-nitrosoguanidine (MNNG) **161**, 117

**Chlorzoxazone**; CYP2E1; Ionizing radiation; Mitochondrial injury; Aconitase **161**, 79

**Connexin (Cx)**; Cadmium; Cell transformation; Gap junction intercellular communication (GJIC); *N*-methyl-*N*′-nitro-*N*-nitrosoguanidine (MNNG) **161**, 117

**Cryopreservation**; Cytochrome P450; Glucuronidation; Glutathione; Liver slices; Sulfation **161**, 103

**Ctyokines**; Vomitoxin; RAW 264.7 cell line; IL-6; TNF-α; mRNA half-life; Trichothecene; Immunotoxicology; Mycotoxin **161**, 139

**CYP2E1**; Ionizing radiation; Mitochondrial injury; Aconitase; Chlorzoxazone **161**, 79

**Cytochrome P450**; Cryopreservation; Glucuronidation; Glutathione; Liver slices; Sulfation **161**, 103

**Cytochrome P450**; Inhalation; Induction; Inhibition; Western blot; Dose–response; F344 rat; Liver **161**, 67

**Cytochrome P450**; Liver slices; Precision-cut; Histology; β-naphthoflavone; Phenobarbital; Dexamethasone; Glycogen **161**, 53

**Dexamethasone**; Liver slices; Precision-cut; Histology; Cytochrome P450; β-naphthoflavone; Phenobarbital; Glycogen **161**, 53

**Dose–response**; Inhalation; Cytochrome P450; Induction; Inhibition; Western blot; F344 rat; Liver **161**, 67

**DPPH**; Trihydroxybenzaldehyde (THBA); Antioxidant; MTT; Lipid peroxidation; HL-60 cells **161**, 179

**Drinking water**; Aluminum; Oral bioavailability; Gastric contents; Water hardness; Accelerator mass spectrometry; Rat **161**, 93

**Environment**; Hemocyte; Phagocytosis; Flow cytometry; Bivalve; Heavy metals **161**, 201

**Fenvalerate**; Intermediate myasthenia syndrome; Stimulation single fiber electromyography; Repetitive nerve stimulation; Phoxim; Methomyl **161**, 111

**Flow cytometry**; Hemocyte; Phagocytosis; Environment; Bivalve; Heavy metals **161**, 201

**F344 rat**; Inhalation; Cytochrome P450; Induction; Inhibition; Western blot; Dose–response; Liver **161**, 67

PII: S0300-483X(01)00378-X

**Gap junction intercellular communication (GJIC)**; Cadmium; Cell transformation; Connexin (Cx); *N*-methyl-*N'*-nitro-*N*-nitrosoguanidine (MNNG) **161**, 117

**Gastric contents**; Aluminum; Oral bioavailability; Drinking water; Water hardness; Accelerator mass spectrometry; Rat **161**, 93

**Glucuronidation**; Cryopreservation; Cytochrome P450; Glutathione; Liver slices; Sulfation **161**, 103

**Glutathione**; Cryopreservation; Cytochrome P450; Glucuronidation; Liver slices; Sulfation **161**, 103

**Glycogen**; Liver slices; Precision-cut; Histology; Cytochrome P450; β-naphthoflavone; Phenobarbital; Dexamethasone **161**, 53

**Heavy metals**; Hemocyte; Phagocytosis; Flow cytometry; Environment; Bivalve **161**, 201

**Hemocyte**; Phagocytosis; Flow cytometry; Environment; Bivalve; Heavy metals **161**, 201

**Hepatocarcinogenesis**; Immunohistochemical; Urokinase type plasminogen activator **161**, 13

**Histology**; Liver slices; Precision-cut; Cytochrome P450; β-naphthoflavone; Phenobarbital; Dexamethasone; Glycogen **161**, 53

**HL-60 cells**; Trihydroxybenzaldehyde (THBA); DPPH; Antioxidant; MTT; Lipid peroxidation **161**, 179

**Hydrazines**; Agaricus bisporus; Mushroom; Agaritine; Tyrosinase-bioactivation **161**, 165

**IL-6**; Vomitoxin; RAW 264.7 cell line; Ctyokines; TNF-α; mRNA half-life; Trichothecene; Immunotoxicology; Mycotoxin **161**, 139

**Immunohistochemical**; Hepatocarcinogenesis; Urokinase type plasminogen activator **161**, 13

**Immunotoxicology**; Vomitoxin; RAW 264.7 cell line; Ctyokines; IL-6; TNF-α; mRNA half-life; Trichothecene; Mycotoxin **161**, 139

**Induction**; Inhalation; Cytochrome P450; Inhibition; Western blot; Dose–response; F344 rat; Liver **161**, 67

**Inhalation**; Cytochrome P450; Induction; Inhibition; Western blot; Dose–response; F344 rat; Liver **161**, 67

**Inhibition**; Inhalation; Cytochrome P450; Induction; Western blot; Dose–response; F344 rat; Liver **161**, 67

**Injury**; Carbon tetrachloride; Liver; Metallothionein; Rats; Regeneration **161**, 129

**Intermediate myasthenia syndrome**; Stimulation single fiber electromyography; Repetitive nerve stimulation; Phoxim; Methomyl; Fenvalerate **161**, 111

**Ionizing radiation**; CYP2E1; Mitochondrial injury; Aconitase; Chlorzoxazone **161**, 79

**JP-8**; Percutaneous absorption; Skin barrier function; Skin irritation; Minipigs **161**, 1

**Lipid peroxidation**; Trihydroxybenzaldehyde (THBA); DPPH; Antioxidant; MTT; HL-60 cells **161**, 179

**Liver**; Carbon tetrachloride; Injury; Metallothionein; Rats; Regeneration **161**, 129

**Liver**; Inhalation; Cytochrome P450; Induction; Inhibition; Western blot; Dose–response; F344 rat **161**, 67

**Liver slices**; Cryopreservation; Cytochrome P450; Glucuronidation; Glutathione; Sulfation **161**, 103

**Liver slices**; Precision-cut; Histology; Cytochrome P450; β-naphthoflavone; Phenobarbital; Dexamethasone; Glycogen **161**, 53

**Lung**; Cadmium adaptation; Oxidative DNA damage/repair **161**, 25

**Lung fibrosis**; Obstructive lung disease; Animal model; Pulmonary function measurements **161**, 153

**Metallothionein**; Carbon tetrachloride; Injury; Liver; Rats; Regeneration **161**, 129

**Methomyl**; Intermediate myasthenia syndrome; Stimulation single fiber electromyography; Repetitive nerve stimulation; Phoxim; Fenvalerate **161**, 111

**Minipigs**; JP-8; Percutaneous absorption; Skin barrier function; Skin irritation **161**, 1

**Mitochondrial injury**; CYP2E1; Ionizing radiation; Aconitase; Chlorzoxazone **161**, 79

**mRNA half-life**; Vomitoxin; RAW 264.7 cell line; Ctyokines; IL-6; TNF-α; Trichothecene; Immunotoxicology; Mycotoxin **161**, 139

**MTT**; Trihydroxybenzaldehyde (THBA); DPPH; Antioxidant; Lipid peroxidation; HL-60 cells **161**, 179

**Mushroom**; Agaricus bisporus; Agaritine; Hydrazines; Tyrosinase-bioactivation **161**, 165

**Mycotoxin**; Vomitoxin; RAW 264.7 cell line; Ctyokines; IL-6; TNF-α; mRNA half-life; Trichothecene; Immunotoxicology **161**, 139

**β-naphthoflavone**; Liver slices; Precision-cut; Histology; Cytochrome P450; Phenobarbital; Dexamethasone; Glycogen **161**, 53

***N*-methyl-*N'*-nitro-*N*-nitrosoguanidine (MNNG)**; Cadmium; Cell transformation; Connexin (Cx); Gap junction intercellular communication (GJIC) **161**, 117

**Obstructive lung disease**; Lung fibrosis; Animal model; Pulmonary function measurements **161**, 153

**Oral bioavailability**; Aluminum; Drinking water; Gastric contents; Water hardness; Accelerator mass spectrometry; Rat **161**, 93

**Oxidative DNA damage/repair**; Cadmium adaptation; Lung **161**, 25

**Percutaneous absorption**; JP-8; Skin barrier function; Skin irritation; Minipigs **161**, 1

**Phagocytosis**; Hemocyte; Flow cytometry; Environment; Bivalve; Heavy metals **161**, 201

**Phenobarbital**; Liver slices; Precision-cut; Histology; Cytochrome P450; β-naphthoflavone; Dexamethasone; Glycogen **161**, 53

**Phoxim**; Intermediate myasthenia syndrome; Stimulation single fiber electromyography; Repetitive nerve stimulation; Methomyl; Fenvalerate **161**, 111

**Precision-cut**; Liver slices; Histology; Cytochrome P450; β-naphthoflavone; Phenobarbital; Dexamethasone; Glycogen **161**, 53

**Pulmonary function measurements**; Lung fibrosis; Obstructive lung disease; Animal model **161**, 153

**Rat**; Aluminum; Oral bioavailability; Drinking water; Gastric contents; Water hardness; Accelerator mass spectrometry **161**, 93

**Rats**; Carbon tetrachloride; Injury; Liver; Metallothionein; Regeneration **161**, 129

**RAW 264.7 cell line**; Vomitoxin; Ctyokines; IL-6; TNF-α; mRNA half-life; Trichothecene; Immunotoxicology; Mycotoxin **161**, 139

**Regeneration**; Carbon tetrachloride; Injury; Liver; Metallothionein; Rats **161**, 129

**Repetitive nerve stimulation**; Intermediate myasthenia syndrome; Stimulation single fiber electromyography; Phoxim; Methomyl; Fenvalerate **161**, 111

**Skin barrier function**; JP-8; Percutaneous absorption; Skin irritation; Minipigs **161**, 1

**Skin irritation**; JP-8; Percutaneous absorption; Skin barrier function; Minipigs **161**, 1

**Stimulation single fiber electromyography**; Intermediate myasthenia syndrome; Repetitive nerve stimulation; Phoxim; Methomyl; Fenvalerate **161**, 111

**Sulfation**; Cryopreservation; Cytochrome P450; Glucuronidation; Glutathione; Liver slices **161**, 103

**TNF-α**; Vomitoxin; RAW 264.7 cell line; Ctyokines; IL-6; mRNA half-life; Trichothecene; Immunotoxicology; Mycotoxin **161**, 139

**Toxicity of fumonisin $B_1$ in rats** **161**, 39

**Trichothecene**; Vomitoxin; RAW 264.7 cell line; Ctyokines; IL-6; TNF-α; mRNA half-life; Immunotoxicology; Mycotoxin **161**, 139

**Trihydroxybenzaldehyde (THBA)**; DPPH; Antioxidant; MTT; Lipid peroxidation; HL-60 cells **161**, 179

**Tyrosinase-bioactivation**; Agaricus bisporus; Mushroom; Agaritine; Hydrazines **161**, 165

**Urokinase type plasminogen activator**; Hepatocarcinogenesis; Immunohistochemical **161**, 13

**Vomitoxin**; RAW 264.7 cell line; Ctyokines; IL-6; TNF-α; mRNA half-life; Trichothecene; Immunotoxicology; Mycotoxin **161**, 139

**Water hardness**; Aluminum; Oral bioavailability; Drinking water; Gastric contents; Accelerator mass spectrometry; Rat **161**, 93

**Western blot**; Inhalation; Cytochrome P450; Induction; Inhibition; Dose–response; F344 rat; Liver **161**, 67
